

Jiqing Zhao

CURRICULUM VITAE

Department of Economics, University of Texas at Austin

Email: jiqingzhao@utexas.edu | Mobile: +1 (608) 949-2485 | Website: sites.google.com/view/jiqingzhao

EDUCATION

University of Texas at Austin

Ph.D. in Economics

Austin, TX

Sep. 2021 – Jun. 2027 (Expected)

University of Wisconsin - Madison

M.S. in Economics

Madison, WI

Sep. 2019 – Jun. 2021

Zhongnan University of Economics and Law

Bachelor of Economics

Wuhan, China

Sep. 2015 – Jun. 2019

WORKING PAPERS

Efficient Instrumental Variable Estimation under Sequential Missingness (*Job Market Paper*)

Abstract. Missing data poses a challenge for instrumental variable estimation when endogenous variables and instruments are incompletely observed across survey modules, linked records, or multiple waves. I introduce a sequential missing-at-random condition that allows instrument availability to depend on observed endogenous variables and permits dependence among instrument observation indicators. This relaxes the common restriction that instrument availability depends only on the always observed variables. Under this condition, I establish identification and develop a two-step inverse probability weighted GMM estimator that combines available moments across observation patterns using sequential inverse probability weights. I establish consistency and asymptotic normality and derive feasible weighting matrices that minimize asymptotic variance within the proposed estimator class. Monte Carlo simulations illustrate the consequences of misspecified observation models and the benefits of flexible estimation. An application to family size and schooling using an extended sample from the Indonesia Family Life Survey finds statistically significant evidence that larger sibling counts reduce children's schooling under the maintained identifying assumptions. The resulting framework generalizes IPW-GMM estimation under weaker restrictions on data availability.

Heterogeneous Treatment Effect in Panel Data with Machine Learning

WORK IN PROGRESS

Variable Selection Model with Machine Learning Imputation for Incomplete Big Data

RESEARCH EXPERIENCE

University of Texas at Austin

Research Assistant for Prof. Manuela Angelucci

Austin, TX

Jun. 2025 – Nov. 2025

Wuhan Wuda Zoyon Science and Technology Co., Ltd.

Research Assistant for Dr. Dejin Zhang

Wuhan, China

Jun. 2018 – Dec. 2018

TEACHING EXPERIENCE

University of Texas at Austin

Assistant Instructor

Austin, TX

Summer 2026

- **Eco 329 (Economic Statistics):** Summer 2026

Teaching Assistant

2021 – Present

- **Eco 388D (Econometrics II):** Instructor Brendan Kline (Spring 2025, Spring 2026)
- **Eco 441K (Introduction to Econometrics):** Instructor Brendan Kline (Spring 2024); Instructor Helen Schneider (Fall 2025)
- **Eco 350K (Public Policy and AI):** Instructor Peter Bergman (Spring 2023)
- **Eco 329 (Economic Statistics):** Instructor Jason Abrevaya (Fall 2021, Fall 2023, Fall 2024); Instructor Thomas Wiseman (Fall 2022); Instructor Daniel Slesnick (Spring 2022)

University of Wisconsin - Madison

Grader for Econ 702 (Macroeconomics)

Madison, WI

Spring 2021

CONFERENCE PARTICIPATION

Allied Social Science Associations (ASSA) Annual Meeting 2027, Poster Session (*scheduled*)

Southern Economic Association (SEA) Annual Meeting 2026 (*scheduled*)

Texas Econometrics Camp 2026

Texas Econometrics Camp 2025

SKILLS

Programming: R, Python, Stata, MATLAB

Languages: Chinese (Native), English (Fluent)
